

Treatment Contract/Registration

WELCOME! The most important goal of therapy is to help you feel and do better in your life. This is a solution-focused, goal directed approach for a wide variety of problems, from crises in daily living to ongoing mental health issues. It is especially important that you keep in close contact with family and supportive friends during a crisis and that you assume responsibilities for helping yourself. Treatment will be provided in the least restrictive environment possible.

We understand at times you may be in a psychological or life-threatening crisis. Since our counselors are frequently in session with other clients and thus may not be immediately available to assist you through your crisis we ask that you follow the crisis procedures outlined below. Please discuss any questions you have about these procedures with your practitioner.

In a crisis situation please do the following:

If you are in a life-threatening crisis please go to the nearest emergency department or call 911 no matter what time of day it is.

If you are in urgent need to talk to your therapist, please call or text your therapist. Include a phone number in any message you leave AND indicate that it is an urgent matter

Signatures indicate that you have read, understand and agree to the above.

Special Confidentiality Agreement for Parents

Your child has the right to private, confidential communication with the therapist providing care. This means that some of the issues that they discuss will stay between them and that we will not disclose that information to anyone, including you, unless we have been given permission by your child to do so. We need your child to be open and honest with us in order to understand and treat the full range of issues your child is dealing with, and they may be too scared, angry, or ashamed right now to share those issues with you. We also recognize it is very important for you to know what your child is going through in order to do your job as a parent, which is why we will always encourage your child to be honest with you. We will encourage, prepare and support your child so that they feel safe enough to share those issues with you.

Consistent with ACTS Therapy policy, Minnesota law, and the federal patient privacy law known as HIPAA, your child will need to give his/her consent for us to disclose:

- All Mental Health records for children age 16 or older.
- All information concerning pregnancy, sexual activity, STD's and drug/alcohol use or abuse, regardless of the child's age
- Any information that your child's provider believes, if released, could cause harm to your child or to someone else, or that would significantly harm the treatment relationship with your child.

You should know that this confidentiality has limits. If there is any threat to your child's life, we have the duty to inform you and help to create a plan for safety. In addition, there are situations that we are mandated to report and cannot keep confidential. Those situations include: threats against another person, physical or sexual abuse, neglect, and pregnant women who report using drugs

We recognize how challenging it can be for a parent to raise a child, especially when the child has problems or a mental illness. We know how badly you might want to know everything your child has kept a secret from you, too. We want to be your partner in supporting your child's physical and mental wellbeing, and even when we can't discuss certain details about your child with you, we will always be there for you; guiding you and giving your child the best advice possible to protect him/her and encourage healthy decisions, including being open and honest with you.

I have read this from and I understand that I may not be able to receive all the information my child provides to ACTS Therapy LLC.
